The focus of technology in today's organizations has shifted from serving internal needs – like improving efficiencies and controlling costs – to engaging with external customers and creating new business opportunities. Today's forward-focused companies must develop new strategies to automate their businesses through applications that help them eliminate time-consuming, manual and costly tasks – and replace them with automated processes that reduce redundancy and operating costs.

At **Shree Partners**, our expertise in the multi-platform ecosystem makes us the perfect partner for clients looking to seamlessly transition from legacy systems to powerful new platforms. We provide industry-leading consulting solutions that help our clients run more productive, efficient and profitable operations.

Working Together to Solve Business Challenges

The Shree Partners team works closely with your organization to design and implement tailored solutions that fit your specific requirements.

- **Full Stack Development**

Our full stack developers are trained in both front- and back-end technologies to help your business create superior websites, mobile applications and customized apps that meet your organization's unique needs.

- **Product Engineering**

Shree Partners product engineering professionals work side-by-side with your team to offer leading-edge consulting in ideation, architecture, design, testing, deployment, maintenance, support – and more. Our systems are customized to address your specific needs and requirements.

- **Proof of Concept**

Key client stakeholders are typically non-technical and focus on “high level” organizational issues. Our account team starts by developing a “proof of concept” for a particular business unit; then we work closely with your internal constituents to identify shared goals, priorities, action steps and solutions that deliver the best solution for each use case.

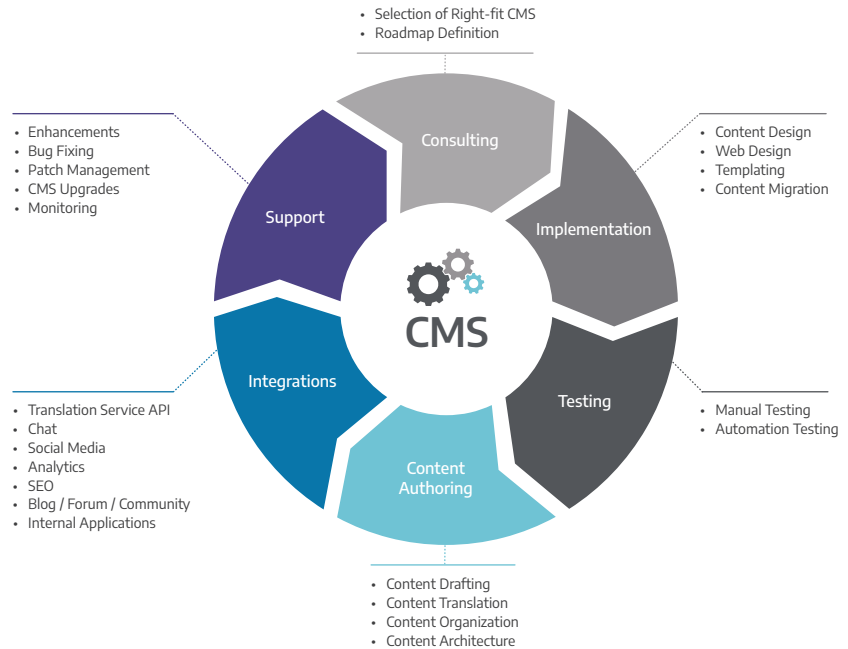

Application Development and Maintenance

Shree Partners Application Services and Automation Solutions

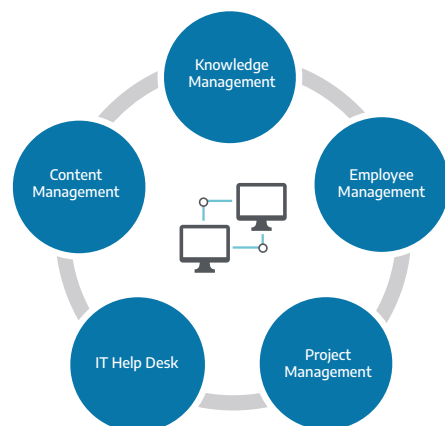

Digital Marketing and Collaboration

Our digital marketing and collaboration solution features leading-edge, integrated document management tools and content management (CMS) systems. Tools like Sitecore and SharePoint help clients bring their organizations together for improved operations, efficiencies and revenue. As clients gain better control of their internal online content, end users enjoy greater flexibility with self-service options. Documents in the CMS system are securely stored, protected from deletion and overwriting, and can be tagged to enable users to find the right content at the right time. Centralized document storage, retrieval and sharing fosters seamless collaboration among teams located across an organization's diverse global locations.

Intranet Solutions

Clients with employees working on multiple platforms, devices and global locations require seamless communication across diverse internal teams and external stakeholders. Our comprehensive intranet solutions feature meeting management modules, collaboration tools and content management systems that work across all devices and facilitate optimal collaboration, access and sharing.

Product Engineering Services

Throughout the product lifecycle, our teams work closely with you to deliver tech-superior, future-proof products and services including ideation, architecture, design, testing, maintenance – and more. Our leading technologies and product engineering services help you get to market faster, reduce development time and costs, and improve scalability, productivity and profitability.

Test Automation

For many mission-critical applications, intensive manual testing can be painstaking across the design, development and deployment stages. Shree professionals work closely with you to create efficient, error-free strategic test plans that ensure optimum outcomes. Our test automation processes help you overcome common challenges through custom scripts, frameworks, repositories and maintenance.

Full Stack Development

Shree's full stack development solutions deliver advanced knowledge and expertise in systems engineering, leading development frameworks, third-party libraries, programming languages and multiple application / web development areas. Our developers help you solve your most complex business challenges by delivering customized solutions that address your key requirements.

Enterprise Mobility Management

Shree's enterprise mobility management (EMM) solutions help you run a more productive, mobile-optimized organization, while enabling employees to use mobile apps and devices securely and synergistically company-wide. Expertise includes end-to-end support in email, application, endpoint and content management. Additional consulting areas include data loss prevention, access control, user accountability, regulatory compliance, BYOD (Bring Your Own Device) policies – and more.

```

    _mod.use_x = True
    _mod.use_y = False
    _mod.use_z = False
    operation = "MIRROR_Y"
    _mod.use_x = False
    _mod.use_y = True
    _mod.use_z = False
    operation = "MIRROR_Z"
    _mod.use_x = False
    _mod.use_y = False
    _mod.use_z = True

```

Key Benefits

- **Digital marketing and collaboration**
Foster internal collaboration across remote locations with centralized document storage, sharing and retrieval; improve operations, efficiencies and revenue.
- **Internet solutions** – Enhance collaboration, productivity and scalability; reduce help desk cost.
- **Product engineering** – Go to market faster; reduce development time and costs; improve productivity and profitability.
- **Test automation** – An efficient, error-free strategic test plan ensures optimum business outcomes.
- **Full stack development** – Reduce cost and time to market; enhance the end-user experience.
- **Enterprise mobility management**
Run a more a productive, mobile-optimized organization; ensure synergistic, secure mobile device / app usage across the company.
