

Data Management and Analytics Solutions for Today's Businesses

In today's digitally competitive world, organizations are continually collecting disparate data from various sources, regardless of the data's origin, size or type. Organizations must effectively manage this data to derive actionable insights that help them improve decision-making capabilities, increase operational efficiencies, and enhance the overall customer experience.

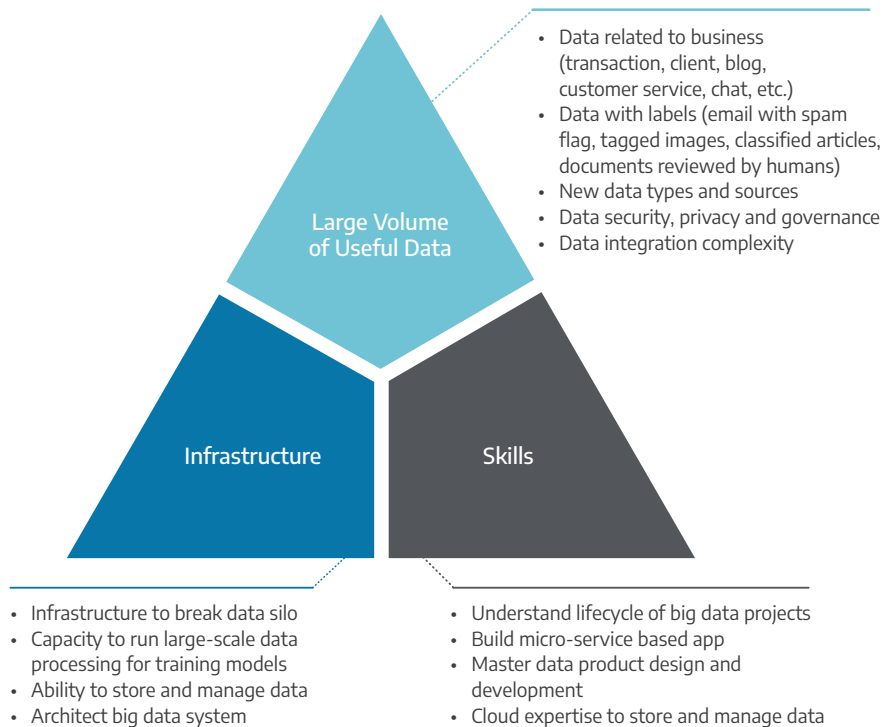

Shree Partners helps you understand and apply the data – fast, in real time – so you can deliver

keen insights that facilitate strong decision-making across your organization. Our data management and analytics solutions can be seamlessly integrated with any legacy system. We help you exploit the power of data using AI and cognitive computing solutions, data science, data lakes consulting and big data solutions. Our infrastructure is designed to help you carry out large-scale data processing, and our extensive cloud management expertise enables us to store data and leverage the power of AI and business intelligence (BI) to deliver future-forward business outcomes.

Working Together to Solve Business Challenges

The Shree Partners team works closely with your organization to design and implement solutions that fit your specific requirements, and deliver a competitive advantage by providing real-time, actionable insights into your data.

- **Design and Strategy** – We help you design a data strategy that can lead to operational efficiencies across multiple focus areas, remove data availability challenges, and ensure data ingestion and consumption is fast and efficient.
- **Analytics** – For any organization, creating actionable insights from your data is a critical success factor. We provide analytics solutions that help you gain real-time insights into the data; our forecasting techniques help you gauge future success for a competitive advantage.
- **Proof of Concept** – Our account team starts by developing a “proof of concept” for your unique vision; then we work closely with your internal constituents to identify shared goals, priorities, action steps and solutions that deliver the best solution for each use case.

Shree Partners Data Management and Analytics Solutions

Big Data Solutions

Big data is a combination of all the processes and tools needed to manage and utilize large data sets. By leveraging big data, your organization can use analytics to better serve your customers, plus create new experiences, services and products. As the digital ecosystem slowly moves from “digital-first” to fully digital, Shree Partners offers advanced, innovative solutions that help your company maximize your value and expand revenue streams. Our big data analytics solutions help you harness and apply your data to identify new opportunities. This in turn leads to smarter decision-making, more efficient operations, higher profits and happier customers.

Data Lakes Design, Strategy and Implementation

In a data-driven world, the ability to leverage insights from disparate data is a decision-making differentiator. Storage repositories containing raw data in native formats enable businesses to run every conceivable type of analytics: dashboards, real-time, machine learning and big data. Data lakes can help your business slash IT costs for storage and data management by as much as 71%.

Shree's expertise in data science and analytics helps you optimize your storage options; we ensure that your applications are deployed quickly and seamlessly with negligible downtime. Our ability to integrate emerging technologies into data – including machine learning – delivers a wide range of solutions that help you maximize data storage and management.

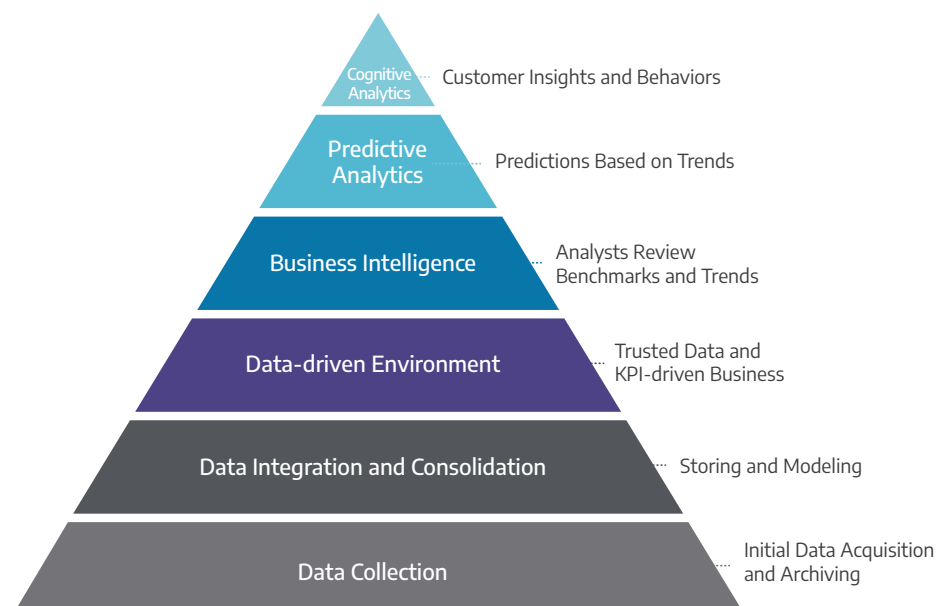

Data Science, Predictive and Prescriptive Analytics

Our ability to analyze complex data from disparate sources (both structured and unstructured) helps you leverage the untapped potential of data to address critical business challenges. Our data science, predictive and prescriptive solutions use a combination of analysis, data mining, machine learning, coding, algorithms, and statistics to help you make critical business decisions. By creating predictive models, you can monitor real-time transactional data more effectively. By conducting comprehensive data analyses, you can initiate preemptive measures like uncovering fraudulent activities, for example.

Business Intelligence and Analytics

Business intelligence (BI) empowers your company to make decisions more proactively, including evolving scenarios, threats and opportunities. Shree's BI solutions give you the advantage of self-service analysis to act quickly on key insights. As a result, you gain greater transparency over your operation by quickly assessing complex data sets. By tracking various departmental metrics, your company can monitor performance and make scale-up / down decisions. Shree's BI solutions include reports, dashboards and visualizations to help you collect, analyze, track and compare data in different combinations to refine your strategies.

Other Shree solutions include harnessing natural language processing (NLP) to monitor social media and glean important customer and employee insights. As a result, company decision-makers can use data science to gain more complete, transparent views of your organization.

Key Benefits

- **Big data solutions** – Make decisions quicker in emerging and complex business situations; gain 360-degree view of organizational data for critical decision-making.
- **Data science, predictive and prescriptive analytics** – Apply data-based evidence to support business decisions; improve operational efficiency; boost conversion and personalize customer offers; reduce fraud.
- **Business intelligence and analytics** – Facilitate accurate reporting, planning and analysis; introduce data-supported decision-making; enhance operational efficiency and improve your company's market position.
- **Data lakes design, strategy and implementation** – Effectively store and manage your disparate data; deliver simplified, intuitive searches and queries; scale your operation to address critical issues in real time; improve security.

Business Intelligence and Analytics tools

Domo	BI tools and data visualization on smartphone
Tableau	Connect to almost any database, drag and drop to create visualizations, and share with a click
MicroStrategy	Business analytics and mobility platform helps companies build and deploy analytics and mobility apps
SSRS	Server-based report-generating software system from Microsoft
Power BI	Interactive visualizations and business intelligence capabilities with customized reports and dashboards
QlikView	Business intelligence data discovery product to create guided analytics, applications and dashboards customized to business challenges

About Shree Partners

Shree Partners is a digital transformation and technology solutions company that helps customers increase profitability by designing, developing, implementing and maintaining innovative business solutions that drive revenue and reduce cost.
