

Success Story

Network Operations Center

Leading global claims management company ensures business continuity with a Network Operations Center

The Client

The client is the world's largest publicly listed independent provider of claims management solutions to the risk management and insurance industry, as well as self-insured entities, with an expansive global network serving clients in 70+ countries. The company offers comprehensive, integrated claims services, business process outsourcing and consulting services for major product lines including property and casualty claims management, workers' compensation claims, medical management and legal settlement administration.

Requirements and challenges

The customer needed to streamline operations, improve system monitoring effectiveness, and reduce costs. They were seeking a robust support environment to ensure business continuity across the organization.

- With technology-dependent global operations, the client needed a trusted support system to ensure uninterrupted operations and productivity
- Routine operations required robust network communication, data and applications; having advanced support for operational needs was mission-critical
- The customer needed a highly-responsive solution that addressed their own clients' needs, and operated seamlessly, with no downtime

Shree Partners Solution

We built a global support team comprised of 15 members working 24/5 (Monday-Friday) in three shifts. Five human resources manned each shift; on-call support was provided on weekends to ensure a disruption-free network and call center management

- We deployed a NOC to monitor the network, systems, applications, server infrastructure and availability of critical network devices; the NOC notified users of service disruptions (if any)
- We provided on-demand, real-time availability reports to evaluate and optimize resource utilization and agent-based NOC monitoring
- We conducted an IP traffic analysis that helped IT teams understand the impact of enterprise applications on network performance and usage

Business Benefits

- The NOC helped the client manage traffic patterns for applications, link availability and performance
- The NOC helped IT staff deliver better service response times and quickly resolve reported issues, facilitating higher CSAT
- The NOC helped the company reduce costs by implementing the SD Wan tool, which replaced multiple tools handling integration management – and reduced database storage requirements

About Shree Partners

Shree Partners is a digital transformation and technology solutions company that helps customers increase profitability by designing, developing, implementing and maintaining innovative business solutions that drive revenue and reduce cost.

Founded in 2008, our mission is to deliver high-performance applications by leveraging deep domain competencies. We serve diverse client businesses in travel and hospitality, healthcare, retail and financial services.

Our innovative, technology-based solutions feature a combination of software design, development, implementation and global support services. Our expertise in disruptive technologies – cloud, mobility, analytics and infrastructure – have helped us consistently deliver solutions that add significant business value to clients.
