

Success Story

DevOps Consulting and Implementation

How a client unified and aligned its global operations and infrastructure, and improved overall communication with a DevOps solution

The Client

The client is one of the leading global players in travel management, headquartered in Europe, offering corporate, private and public travel management services. The company is one of the largest in the industry and enjoys a worldwide presence with revenues of \$25 billion.

Requirements and Challenges

The client needed to align its global operations and infrastructure support, as well as speed time-to-market to improve overall communication. Challenges included:

- Development, testing, infrastructure, and operations support teams were segregated by region, resulting in slow communication and cumbersome operations
- Prioritizing deliverables was impacted due to limited resource availability and technical team proficiency
- The client needed a highly responsive, integrated support team that could support customer issues, applications, websites and infrastructure with no downtime, 24/7

Shree Partners Solution

- Deployed a common model across 109 countries
- Improved business and IT alignment through training, coaching and governance
- Centralized offshore support with multi-domain expertise. DevOps extended collaboration and communication between Development, Testing, Infrastructure and Operations teams to reduce time-to-production from weekly to daily and on-demand
- Globally deployed Splunk, a centralized log analysis and monitoring tool to identify and resolve issues – and proactively alert and analyze the YoY, MoM data for server/application utilization to avoid downtime
- Globally deployed SDP, a ticketing tool to centralize reporting issues for all domains; decommissioned local ticketing tools to improve response time
- Reduced application production deployment time with TFS to build automation and continuous integration/delivery that reduced errors and improved quality assurance
- Provided a centralized, online portal to upload, read/write and modify SOPs and application support documents
- Designed end-to-end traceability and visibility of build-deploy-test process

Business Benefits

- Shree successfully implemented DevOps to streamline the communication process and improve customer issue resolution
- Identified and resolved issues up to 60% faster; reduced escalations by up to 85%; converted complex logs to graphs and reports for simpler analysis, reporting and troubleshooting
- Improved response time to save costs and boost revenue

About Shree Partners

Shree Partners is a digital transformation and technology solutions company that helps customers increase profitability by designing, developing, implementing and maintaining innovative business solutions that drive revenue and reduce cost.

Founded in 2008, our mission is to deliver high-performance applications by leveraging deep domain competencies. We serve diverse client businesses in travel and hospitality, healthcare, retail and financial services.

Our innovative, technology-based solutions feature a combination of software design, development, implementation and global support services. Our expertise in disruptive technologies – cloud, mobility, analytics and infrastructure – have helped us consistently deliver solutions that add significant business value to clients.
